

Bulkhead Mount Antenna Assemblies

For SRM6000 and SRM6210E Radio Modems

In the 902-928 MHz ISM band

A- 06BH-3S Antenna Assembly (Kit) includes the following:

- 1- Coax cable, 3' (the standard cable length is 3', contact Data-Linc Group for other lengths) with a male standard thread SMA and male N Type connectors
- 1- Bulkhead connector with a female N Type and a male BNC connector
- 1- Unity Gain omni directional antenna, 6" approximate length

Note: Many customers have experienced adequate communications with the supplied whip antenna connected directly to the modem. However, if the control cabinet is metal, the radio modem antenna should be located outside the cabinet to obtain maximum radiated RF energy.
