Oricom®
bringing people together

USB Internet Phone
IP-7

With the Oricom IP-7 USB Internet phone users can now make and receive calls via the Internet* at amazingly low rates.

Easy to install, the Oricom IP-7 connects to any PC/laptop USB port and can be used with any Voice over Internet Protocol (VoIP) provider to make cheap calls over the Internet.

For user convenience, the Oricom IP-7 provides familiar keypad dialling, a mute function and an adjustable ringer volume.
