# Delivering Added Value for the Maestro 100

Smart  
Pack  
BACK  
OUT

## ■ Our Open Platform:

- Is a complete embedded **application development** environment;
- Has been designed from the start to fit the **M2M** environment;
- Is fully **license free**, available across the **full GSM product range**;
- Allows both **full GPRS downlink data rate** and **open AT apps execution**.

## ■ Maestro Smart Pack:

- Applications that **boost** the **performance** of the Maestro 100 products and differentiate it from other products in the market;
- Wavecom based;
- Easy to install and **user-friendly**.

# Maestro Smart Pack

Modem status  
check and  
monitoring

I/O triggered  
AT Commands

Automatic  
TCP/UDP socket  
connection

Remote AT  
Command  
through SMS

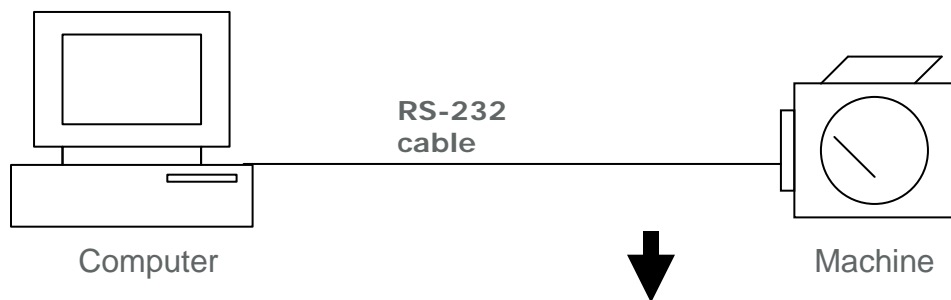

Call screening

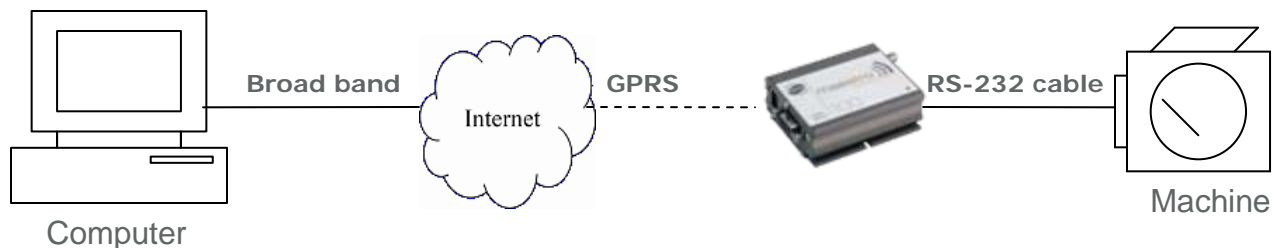

# 1. Automatic TCP/UDP connection

- Works like a RS-232 cable over the Internet
- Allow self recovery

Direct serial connection

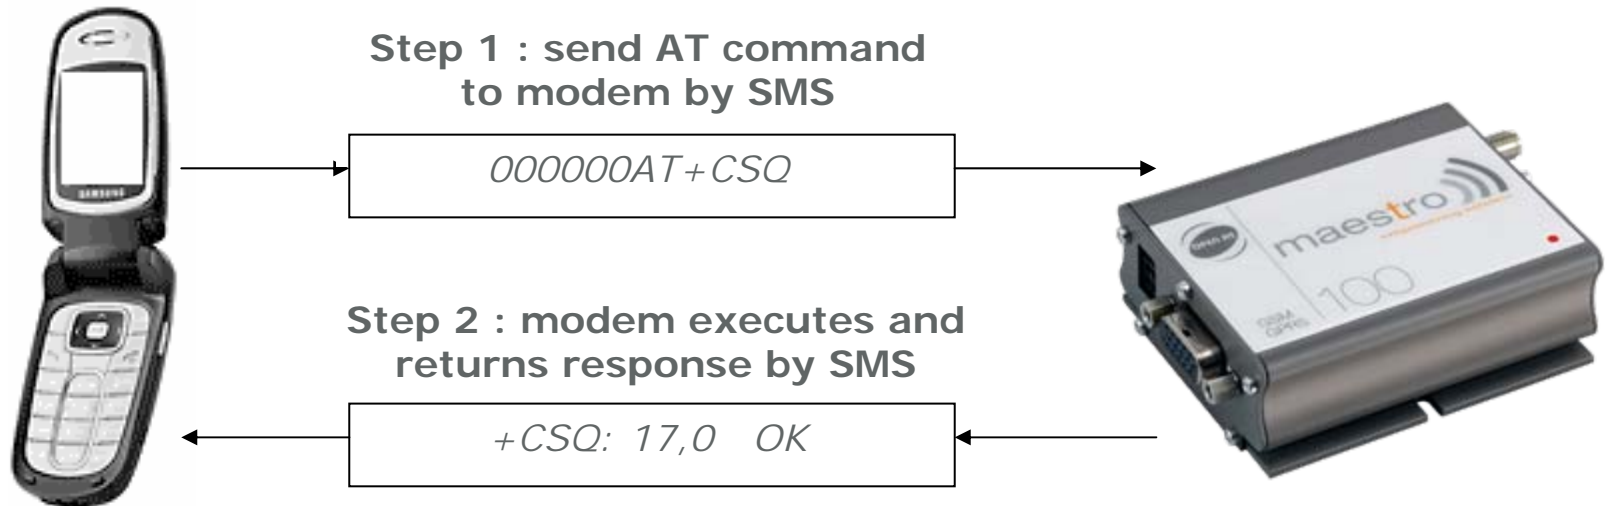

TCP Socket connection via the Internet /GPRS network

## 2. Remote AT command through SMS

*Access your modem remotely by SMS!*

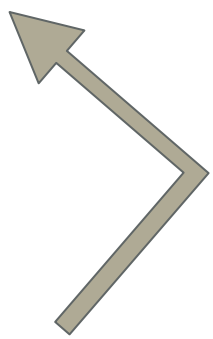

# 3. I/O Triggered AT command

*Maestro as a sensor to detect external event!*

# 4. Call screening

*Reject unauthorized incoming call!*

Allowed no. list :

- 123456789
- 987654321
- 111111111
- 222222222

no. : 33333333

# 5. Modem status check and monitoring

- Monitoring:
  - Network signal strength
  - ROM Data Check
  - IP Adress
  - Input voltage
- The maestro 100 can check the status of the modem in either "one shot" or periodic (per minute) mode.
- It will also report check result by SMS if result is beyond preset limit, and reset automatically if losing network connection.
- The 4 results will be sent on one SMS.

# Thank you for your interest!

**WE HOPE THIS WILL HELP YOU GAIN MORE BUSINESS!**
