

DT400 Cordless Phone

Cordless voice for demanding conditions

When you're on the move and in demanding working conditions, good cordless communication might seem impossible. But the Ericsson DT400 will stand up to the wear and tear of your job. It goes where you go and keeps you in touch with people in your work environment.

The Ericsson DT400 is ideal when you want to stay in touch in a non-office environment. It has a rugged, IP54-classified plastic casing, making it tougher than the average cordless phone. It also means it is resistant to water spray, dust and soil. Wherever you are on site, there's no need for missed calls or lost opportunities.

Based on the future-proof DECT/GAP standard, the DT400 offers outstanding speech quality wherever your job takes you. With sturdy buttons and weighing just 195 grams, this is a phone designed for easy handling.

With the DT400 you get all the convenience of a modern cordless handset that can be customised to suit your needs.

Additional functions include:

- Stores your own personal settings on the SIM card, which allows you to use them in another cordless phone.
- One touch access to your ten most frequently called numbers.
- Identifies callers on the display before you answer.
- Built-in personal phone book that holds up to 75 quick dial entries.
- Fast redialing of the last 10 dialled numbers.
- Built-in vibrator ideal when working in a noisy environment.
