

DT410 Cordless Phone

Cordless voice and messaging in one

When time-critical situations are part of your job, you'll want to stay in touch wherever your duties take you. Designed for demanding working conditions, the DT410 is a rugged cordless phone and short messaging terminal in one. Giving you cordless voice communication wherever you are, plus short messaging even when you're on the phone.

The Ericsson DT410 is rugged and durable, with an IP54-classified plastic casing that will also withstand water spray, dust and soil. Designed for easy handling, the DT410 weighs just 195 grams including the battery. You can talk for 10 hours or be on standby for 100 hours without having to recharge the battery.

Additional features include:

- Receives important messages of up to 128 alphanumeric characters.
- Callers can be identified on the display before you answer.
- Stores the last 10 messages for quick reviewing.
- Built-in personal phone book that holds up to 75 entries for quick dialling.

- Sturdy buttons and a clear LCD display.
- Stores your own personal settings on the SIM card, which can then be used on another cordless phone.

The DT410 has all the convenience of a modern cordless handset. Like all Ericsson cordless phones the DT410 delivers exceptional speech quality, no different to your wired desk phone, wherever you are in the workplace. Based on open DECT standards (CTM FP-2), it will keep pace as cordless technology evolves.
