

## DT430 ATEX Cordless Telephones

*Time-critical situations that demand constant accessibility are a natural part of many jobs today. If your business requires people to stay in touch wherever their duties may take them, Ericsson has a comprehensive range of cordless phones based on DECT (Digital Enhanced Cordless Telecommunications) technology, the premier platform for excellent speech quality and high subscriber capacity. Each telephone is designed for different kinds of work conditions and end-user requirements, and an extensive accessory portfolio is available to match all your end-user needs.*

Ericsson's cordless solutions can provide the ideal telecommunications fit for your organization. By properly identifying your core business processes and assessing your existing infrastructure, we can devise the right combination of equipment for you. The result is an overall solution that works for you, not just in the short term, but for years to come.

DECT is proven technology, which means all of the cordless phones integrate smoothly with your existing telecom equipment. Based on open standards, the system grows as your business grows. The beauty of DECT is that it is future-proof, yet its advantages are available to you today.

The DT430 ATEX cordless phone has built-in convenience in the form of memory functions, an easy-to-read LCD display, and a durable design that is resistant to water spray, dust and soil. The DT430 ATEX is specifically designed for end users who work in environments that require ATEX approved equipment. It includes messaging functionality, an alarm button and a no-movement alarm.

### **Freedom of movement under demanding conditions**

With the DT430 ATEX cordless phone, you get all the convenience of a modern handset, with the mobility offered by wireless technology. You can dial the ten numbers you most frequently use with just one touch. A built-in personal phone book holds up to 75 quick-dial entries, and the 20 numbers last dialed are available for quick redialing. Callers can be identified in the display before you answer. Sturdy buttons and a crisp LCD display make the phones even easier to handle.

You can have access to the information you need, even when you don't have your own phone with you. The DT430 ATEX cordless phone is equipped with a SIM card, for storage of personal settings, subscriptions and the telephone book. Should there be a need to change or replace your telephone, you can retain your personal settings and be instantly up and running by simply moving your current SIM-card over to the new telephone.

The range of accessories available includes a desktop charger, clothing clips and a carrying case. The DT430 ATEX cordless phone includes a built-in vibrator which is especially useful in noisy environments.

### **Setting the standard**

Like all Ericsson cordless phones, the DT430 ATEX cordless phone offers wireline speech quality, regardless of location. Because it is based on open DECT standards (GAP/CAP and DECT-SMS), they will keep pace as technology evolves.

### **Intrinsically safe for potentially hazardous environments**

The DT430 ATEX cordless phone is the ideal telephone for working in an environment that requires intrinsically safe equipment. It will not cause sparks and is safe to use near explosive substances. For emergency situations, it has a one-button personal alarm, plus an automatic no-movement sensor. And the DT430 ATEX advanced messaging system keeps you accessible, even when you're on the telephone.

### When safety is everything

The Ericsson DT430 ATEX delivers complete mobility when on location and boasts a number of impressive safety features in one handset by combining cordless voice communication, short messaging and alarm functionality. It incorporates automatic and manual alarm functions. The durable IP-64 classified casing resists water spray, dust and soil.

The DT430 ATEX has two alarm functions. One press on the large red button situated on top of the telephone transmits a preset message to send help. If the user is incapacitated, the DT430 ATEX has an automatic no-movement alarm that alerts colleagues after a given length of time.

### Built to last

The DT430 ATEX cordless phone is ATEX classified in accordance with: II 2 G EEx ib IIC T4.

The battery pack is screw-locked to the telephone for the utmost safety. No headset accessory is available for the DT430 ATEX. The telephone and its battery must not be charged in explosive areas.

### Peace of mind in hazardous working conditions

- Fast response in emergencies
- Rapid help for injured staff
- Increased personal safety
- Accessible to callers in any location
- Receive urgent messages, even when on the telephone
