WWSI recognises that some people may develop single or multiple disabilities as a result of progressive illnesses or age-related conditions. Others may experience temporary disabilities resulting from traumas such as injury or surgery.

We have also found that many industrial clients have staff that suffers from hearing loss while working in areas with high noise levels, and that communications can be difficult at times.

People who are likely to experience difficulties with communications are those with one or more of the following disabilities:

- Blindness or vision impairment
- Deafness or hearing impairment
- Speech impairment
- Mobility or dexterity impairment

Clients find that communications with staff without the right equipment is not only difficult but also sometimes nearly impossible. Staff that need to be available at all times for their customers do not always have the capacity to do so.

This presentation gives a quick overview what products are currently available for Businesses, Hotels, Hospitals, Nursing Homes, SoHo and private use.

We are here to help to make your communications as easy, efficient and as safe as possible, please feel free to contact me for further product information or for any other communications assistance you may require.

The UNIPHONE is an exciting new concept in TTYs, combining a telephone, TTY and amplified telephone - all in one! Now, people who are deaf, hard of hearing can all share one telephone. A full-featured TTY, the UNIPHONE includes a bright 2-line display and a comfortable keyboard to make TTY conversations easy.

Its attractive, modern design complements any room or office. It is perfect for making Voice Carry over (VCO) calls. With VCO, you speak directly to the other person and read their typed responses on the display. VCO calls can be made through a relay service, or directly between UNIPHONE users. In a similar way, people who cannot speak can make Hearing Carry over (HCO) calls. Turn up the volume on the amplified handset to the most comfortable setting.

Key Features

- ✓ VCO - Voice Carry Over
- ✓ HCO - Hearing Carry Over
- ✓ Turbo Code® &
- ✓ Auto ID™

Other Features

- ✓ Built-in, 24-character printer, with 32k memory
- ✓ Special convenience keys: Dial and Volume control
- ✓ Direct connect & 8k memory
- ✓ Keyboard dialling, follow-on dialling
- ✓ Call progress (display says "busy")
- ✓ 2-line, 2 x 24-character LCD display with backlight
- ✓ Baudot code (45 & 50 baud)
- ✓ Special menu, and arrow keys
- ✓ Auto-Answer with Built-in ring flasher
- ✓ Volume control for telephone handset (20dB gain), with three volume settings.
- ✓ Printer port to connect an external printer with optional printer cable
